📅 28th February 📍 4YFN @ Fira Barcelona Montjuïc

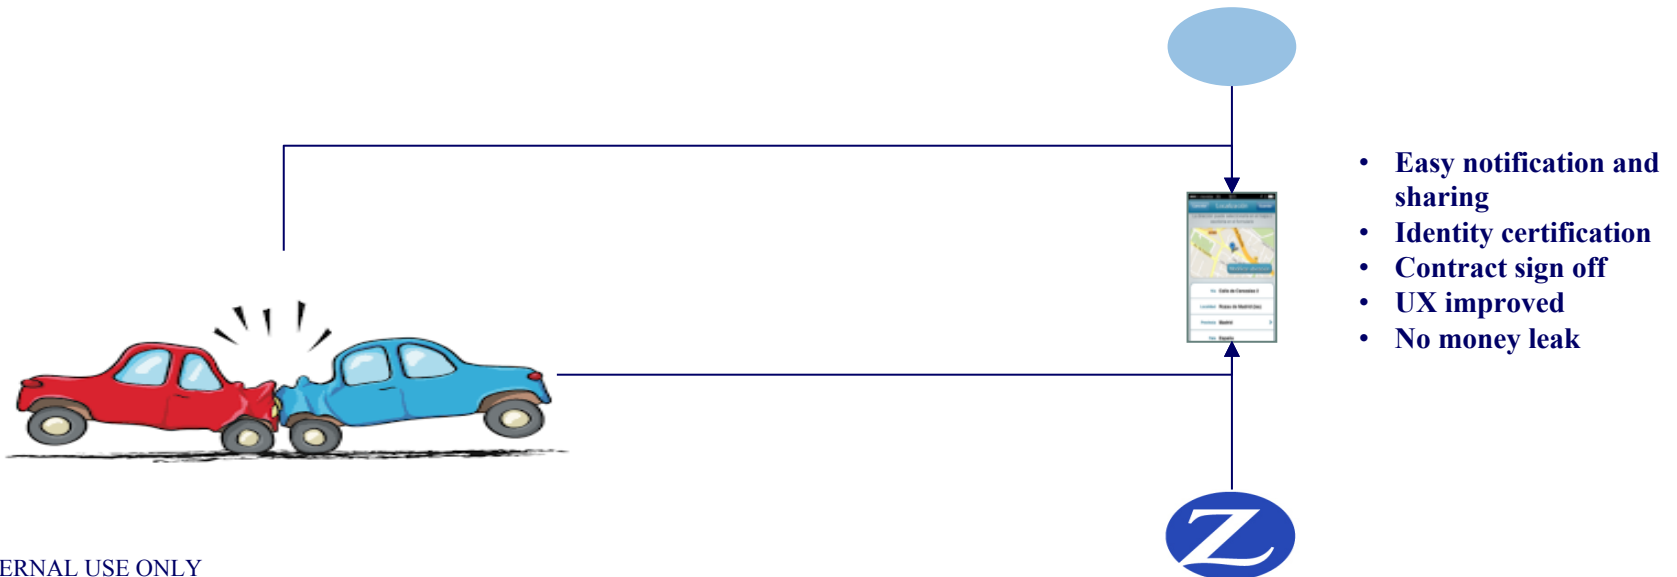

Team 7 – Simplifying UX in Car crashes insurance processes at a much lower cost

Roger Olivet – *BIID*

Alex Gines – *ATRAURA Blockchain*

Andreu Rodriguez – *ATRAURA Blockchain*

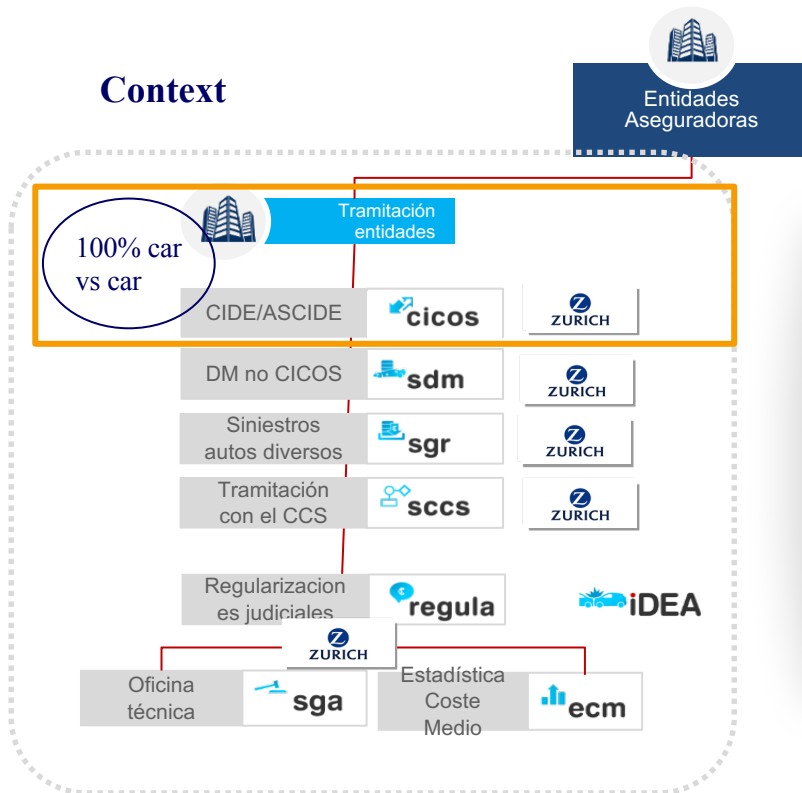

Alberto Altayó - *Zurich*

Car crash claiming process – DAO

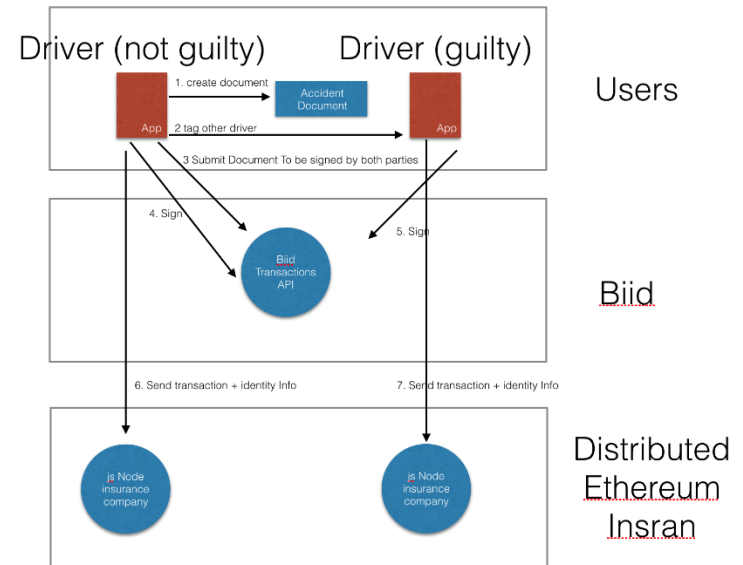

Unespa – Tirea – Car crash agreement (CICOS)

- Increase settlement speed – Increase customer satisfaction and sector reputation
- “fair” system for all insurance companies
- Reduction of managerial costs
- Data privacy guarantee

Car crash agreement DAO

- + Settlement Speed
- + Managerial cost reduction
- + Data privacy guarantee
- + Certified legal identity
- + Auditable
- + Reputation / profitability of insurance sector
- + 100% Digital experience
- + UX increased in notification process (ease information sharing)

Implementation Strategy – 2 different approaches

Short term implementation (driven by TIREA)

Non-centralized implementation

Digital Identity
certification

All policy holders automatically signed up in certified database through blockchain

Complete identity
certification process

Globalize identity certification by
Insurance companies

Implementation without centralized
entity (tough)

Complete
Transaction

Transaction automatically performed
and certified. Standardized process
built up by Tirea with insurance
companies

Transaction automatically performed
and certified.

Integration B2B, decentralized

Benefits

Guarantee of transaction
Speed of settlement
Digital 100%
Internal costs significant reduction
+ sector profitability and reputation
+ services or lower cost to customer

Guarantee of transaction
Speed of settlement
